The Honorable Denise L. Cote
United States District Court
Southern District of New York
500 Pearl Street, Room 1610

Re: *DNAML PTY, Limited v. Apple, Inc., et al.*, 13 Civ. 6516 (DLC)
Diesel eBooks, LLC v. Apple, Inc., et al., 14 Civ. 1768 (DLC)
Abbey House Media, Inc. v. Apple, Inc., et al., 14 Civ. 2000 (DLC)

Dear Judge Cote,

On behalf of the Defendants in the above-referenced matters, we respectfully request that the Court strike certain portions of DNAML's expert reports, order further discovery into the issues raised here, and grant Defendants leave to amend their expert report pending resolution of this letter. Defendants' request arises in connection with *prima facie* spoliation, including the alteration of evidence, and related authenticity concerns that have arisen with respect to core evidence relied upon in the reports of DNAML's experts. Specifically, Dr. Rosen relies on financial forecasts in DNAML_0004402 (**4402**) for his damages estimates.¹ There is substantial evidence that this document, and four similar documents, were altered in November 2013 (more than two months after the commencement of this litigation), presumably to inflate DNAML's claimed injury and damages.

After receiving the Rosen and Ratliff reports, Defendants identified and promptly raised concerns regarding 4402 with DNAML's counsel by email on April 3 and in two telephonic meet-and-confers. DNAML's counsel explained that he had been advised by DNAML that 4402 was opened for roughly one and a half minutes on November 18, 2013 and inadvertently overwritten, but its content was not modified.² Defendants pressed DNAML's counsel regarding DNAML's explanation, but ultimately reached an impasse when, during the final meet-and-confer, DNAML's counsel stated that if Defendants can show spoliation, they should bring this motion.

Defendants thereafter retained a forensic expert, J. Christopher Racich of Vestigant, to investigate further. Mr. Racich's findings³ are inconsistent with DNAML's explanation and suggest multiple bases on which to conclude that 4402 does not reflect revenue estimates prepared as of April/May 2010:

¹ Dr. Rosen states in his damages report, and apparently has been advised by DNAML's counsel, that "the [DNAML] projections prepared as of April/May 2010 [were] the most recent iteration and the basis for this analysis[.]" Rosen Report at 5-6 (citing 4402). Dr. Ratliff relies on 4402 as the sole support for the statement: "DNAML's internal projections forecast that the vast majority of DNAML's revenue would come from eBook retailing as early as 2011." Ratliff Report at 6 (citing 4402).

² Defendants do not have access to "editing time" metadata regarding 4402 and are unable to confirm DNAML's representation with respect to the editing time. Even if 4402 were open for only 1.5 minutes the most recent time it was modified, the document could have been modified numerous times, for any duration, prior to its final save on November 18, 2013 at 10:13 pm. Counsel's explanation also does not address the four similar files, discussed below, that were modified around the same time.

³ Should the Court regard it as helpful in resolving this matter, Defendants are willing to have their forensic examiner appear to be questioned by the Court and counsel for DNAML.

- The revenue forecasts in 4402 are substantially different from forecasts circulated by Adam Schmidt, DNAML's Managing Director (and former CEO), in 2010 and later, including one to DNAML's investment banker in April 2010 (DNAML_0003283).⁴
- There are only five versions of DNAML budgets with revenue projections identical or similar to 4402 – but each has a “last modified” date between November 11 and November 18, 2013 (four of the five versions are last modified on November 18, 2013).
- There is no evidence of revenue forecasts similar to those in 4402 in files last modified in or around April/May 2010. All revenue forecasts in DNAML files last modified in 2010-2011 include far less optimistic projections compared to files last modified in 2013.
- Defendants have located numerous documents e-mailed by DNAML employees in 2011 and 2012 that contain the forecasts at issue here (*See, e.g.*, DNAML_0005387, DNAML_0005404). Each of these documents contains the same significantly lower revenue projections as in DNAML_0003283, the document circulated to DNAML's investment banker in April 2010. *None* contains the projections from 4402.
- As Mr. Racich indicates in his declaration, the metadata and names of the four budget files last saved on November 18, 2013 demonstrate that they were modified *iteratively* in November 2013, ending with 4402.⁵ The finality and completeness implied by the file names of the four files last modified on November 18, 2013 correlates with the time at which each document was last modified. The file last modified at 2:00 am bears the title “DNAML Budget 2009-2011_April 2009;” the version saved at 8:49 pm is titled “DNAML Budget 2009-2011_final;” 23 minutes later, the version saved at 9:12 pm is titled “DNAML Budget 2009-2011_final1;” and the ultimate version, 4402, saved at 10:13 pm, has filename “DNAML Budget 2009-2011_Full_Final.”

On April 23, Defendants provided DNAML's counsel with more detail regarding their findings, informed them of Defendants' intent to file this motion, and stated that DNAML's counsel could call if they learned new information about this issue. They have not done so.

Defendants respectfully request that the Court: (1) strike the portions of DNAML's expert reports that rely upon 4402; (2) order further discovery into spoliation, including document alteration related to at least the documents cited in this motion and a forensic audit of relevant DNAML computers and IT infrastructure; and (3) allow leave for Defendants' expert to amend his report following resolution of this issue. Plaintiffs' experts should not be allowed to rely upon a document that, on its face, was modified during the pendency of this litigation.

⁴ For the time periods for which both 4402 and DNAML_0003283 provide forecasts, such forecasts do not match. Moreover, 4402 forecasts eBooks revenue through the end of calendar year 2011, while DNAML_0003283 includes forecasts for eBooks revenue through only March 2011. This discrepancy is particularly important for Dr. Rosen's damages estimate because 4402 forecasts ^{REDACTED} greater eBook revenue in 2011 than in 2010 – from ^{REDACTED} to ^{REDACTED} – a significant year-over-year change over a time period for most of which DNAML_0003283 does not include projections.

⁵ The Appendix demonstrates that each subsequent version (with a later modified date) reflects cumulative changes from all earlier versions (with an earlier modified date).

Respectfully Submitted,

A handwritten signature in black ink, appearing to read 'Michael Lacovara', with a long horizontal stroke extending to the right.

Michael Lacovara

(Enclosure)

APPENDIX: DNAML BUDGET PROJECTION COMPARISONS

We have identified five versions of DNAML’s budget projections – including DNAML_0004402 (**4402**), a document relied upon by DNAML’s experts – that have a last modified date in November 2013. The earliest version (last-modified date November 11, 2013) has file name “DNAML Budget 2009-2011,”¹ and the final version (last-modified on November 18, 2013 at 10:13 pm) has file name “DNAML Budget 2009-2011_Full_Final.”² It is this final version that is 4402. The values and formulas in the four files modified before 4402 demonstrate that they are most likely earlier versions of 4402. In particular, it is clear that on November 18, 2013, these forecasts underwent iterative revisions culminating in 4402. Such changes resulted in thousands of “calculated value” changes in the budget projections because each critical input that was modified affected numerous linked formulas and results.

Table A, below, surveys the calculated values of particularly relevant projections: total eBook Direct Sales, total eBook revenue, total income, and total operating profit after tax. It shows such projections for DNAML_0003283, the projection sent in 2010 from Adam Schmidt to DNAML’s investment banker,³ and the five versions of DNAML’s budget projections last modified in 2013.

Table B, below, compares each successive versions (8:49 pm, 9:12 pm and 10:13 pm) modified over the course November 18, 2013 with “DNAML Budget 2009-2011_April 2009,”¹³ the first version saved on that date (2:00 am). It demonstrates that each subsequent file (with a later modified time) reflects cumulative changes from the earlier files. The final file in this succession, “DNAML Budget 2009-2011_Full_Final,” is the projection relied upon to DNAML’s experts, 4402.

DECLARATION OF J. CHRISTOPHER RACICH

I, J. Christopher Racich, declare under penalty of perjury, pursuant to 28 U.S.C. § 1746, that the following information is true and correct:

1. I am the President of Vestigant. Vestigant is a technology and computer forensic consulting firm that assists clients with fact-finding in litigation, regulatory reviews, and business decisions. I founded Vestigant in 2009 and, since that time, Vestigant has been retained in hundreds of Computer Forensic and E-Discovery matters. Prior to founding Vestigant, I headed the forensic computer practice at CoreFacts (and, after a merger, First Advantage) for eight years and was a director of high tech investigations at Kroll & Associates for four years.

2. I am a 1993 graduate of Cornell University where I received my Bachelor of Arts degree (Biology). I later attended law school at the Washington College of Law at American University, graduating with a Juris Doctor in 1997. I remain an attorney and active member in good standing licensed to practice law in the State of New York and the District of Columbia.

3. I have taken numerous courses and attended multiple seminars in the field of computer forensics over the past 16 years. I have taught computer forensics courses at the High Tech Crimes Investigation Association (HTCIA). I am also an adjunct Professor of Law at the Washington College of Law at American University, where I teach an electronic discovery course.

4. During my career in the computer forensics field, I have provided testimony as an expert in computer forensics in numerous courts, including the United States District Court for the Eastern District of Virginia, the United States District Court for the Southern District of Florida, the United States District Court for the Southern District of Texas, the Superior Court for the District of Columbia, the Missouri Circuit Court, the Supreme Court of the State of New York, County of New York, the Larimer County District Court in Colorado, and the

Pennsylvania Court of Common Pleas, as well as before the National Labor Relations Board. I have also provided expert deposition testimony and affidavits similar to this one in the area of computer forensics in connection with numerous civil claims. I have been qualified at least 28 times as an expert in computer forensics in a court of law or arbitration proceeding. A copy of my Curriculum Vitae, attached as Exhibit A, provides further information about my expertise and background, including the matters and venues in which I have testified.

5. In order to conduct my analysis in the above captioned matters, I signed a copy of the Protective Order in these cases and was provided with the documents listed in Table 1 below by Defendants' counsel. I understand from Defendants' counsel that these documents had previously been produced to Defendants by Plaintiff DNAML.

6. It is my understanding that two of these documents are cited in reports of DNAML's two economic experts. Dr. Michael Rosen cites DNAML_0004399, while both Drs. Rosen and James Ratliff rely upon DNAML_0004402. I understand that Dr. Rosen states in his damages report, and apparently has been advised by counsel for DNAML, that DNAML_0004402 was "prepared as of April/May 2010" and was "the most recent iteration" of DNAML's projections.

7. Based on my forensic analysis of the documents and their metadata, the dates in Table 1 below reflect the last modified date for each of the documents I examined. These dates represent the last time each document was saved using Microsoft Excel. As their metadata indicates, both DNAML_0004399 and DNAML_0004402 were last modified in November of 2013. DNAML_00040399 is an e-mail sent by Adam Schmidt to JuSung Kim on November 18, 2013. One of its attachments produced in native format, "DNAML Budget 2009-2011," was last modified at 3:04 am on November 11, 2013.

8. DNAML_0004402 is an e-mail sent by Adam Schmidt to JuSung Kim on November 19, 2013. Its attachment produced in native format, "DNAML Budget 2009-2011_Full_Final.xls," was last modified at 10:13 pm on November 18, 2013.

9. Based upon my review of the content of the files and the metadata, the native spreadsheets attached to DNAML_0004399 and DNAML_0004402 appear to be iterations of the same document. In between these two iterations, at least three other iterations appear to exist in DNAML's production, and each of these was modified on November 18, 2013.

10. There are hundreds, if not thousands, of changes to values, formulas, and formatting of these spreadsheets from November 2013. As part of my analysis, I used a file comparison tool to identify all differences between these November 2013 forecasts in order of last-modified date and recorded those comparisons in Exhibits 2–4 as indicated in Table 2.

11. Comparison of Exhibits 2–4, summarized in the Appendix, illustrates that specific changes made in earlier-saved versions of the file also appear in later-saved versions of the file. Based upon my forensic analysis and experience as a forensic investigator, it is highly likely that the explanation for this continuity is that the later-saved versions were modifications of the earlier-saved versions of the file.

12. Based on my forensic analysis, I do not believe that DNAML_0004399 and DNAML_0004402 were "prepared as of April/May 2010." Rather, these documents and the iterations in between appear to have been substantively modified in November 2013.

PROFESSIONAL EXPERIENCE

Sept. 2009 – Present: Vestigant, LLC – President

Create and operate computer forensics/E-Discovery Consulting business

Lead, work and testify in all manner of Computer Forensics/E-Discovery cases

Gather and investigation of data for a variety of civil and criminal matters. Matters include fraud, embezzlement, sexual harassment, intellectual property theft violation of non-compete clauses, child pornography, and computer, network, and PBX/voice mail hacking

Aug. 2010 – Present: American University, Washington College of Law – Adjunct Professor

Teaching “Litigation in the Digital Age: E-discovery and Electronically Stored Information Law”

Dec. 2008 to Sept. 2009: First Advantage – Senior Regional Practice Leader and Counsel

2006 to 2008: First Advantage – Senior VP and Counsel

2004 to 2006: First Advantage CoreFacts Managing Director and Counsel

2001 to 2004: CoreFacts Managing Director and Counsel

Head computer forensics practice

Lead numerous large scale electronic discovery consulting projects and act as lead consulting expert

Lead work and testify in all manner of Computer Forensics/E-Discovery cases

1997 to 2001: Kroll Associates – Director, High Tech Investigation, Mid-Atlantic Region

Develop and lead the firm’s Mid-Atlantic high tech investigation practice from Kroll’s Washington, DC office

Manage numerous investigations and computer forensic engagements for the firm

Testify as a computer forensic expert
